Overview

10/08/2018

SYST VDN

SYST VEN

SYST VD CLC

## QUICK FACTS

### SYST VDN

- Included in PRIMO VS , SYST RK and PARAGON factory mounted control kit
- Full stroke is ensured irrespective of preset  $K_v$ -value, meaning accurate regulation even at low flowrates
- See SYST VDN product sheet for more info

### SYST VEN

- SYST VEN 115 is included in PARASOL and PACIFIC factory mounted control kit
- SYST VEN 120 is used for PACIFIC cooling circuit
- Full stroke is ensured irrespective of preset  $K_v$ -value meaning accurate regulation even at low flowrates
- See SYST VEN product sheet for more info

### SYST VD CLC

- Less accuracy at low flow rates compared to SYST VDN / SYST VEN
- Only available as separate accessory
- Handles larger flows compared to SYST VDN / SYST VEN
- See SYST VD CLC product sheet for more info

Art. SYST VDN	Dim.	$K_v$ (m <sup>3</sup> /h)
SYST VDN 215	DN15 (1/2")	0,10-0,89

Art. SYST VEN	Dim.	$K_v$ (m <sup>3</sup> /h)
SYST VEN 115	DN15 (1/2")	0,10-0,89
SYST VEN 120	DN20 (3/4")	0,31-1,41

Art. SYST VD CLC	Dim.	$K_v$ (m <sup>3</sup> /h)
SYST VD 115 CLC	DN15 (1/2")	0,25-1,90
SYST VD 120 CLC	DN20 (3/4")	0,25-2,60
